

The Problem

Your Visa card has great benefits.

You're just missing them.

Students miss ₹900–₹1,200 every month because benefits are invisible at the moment of use.

THE INSIGHT

Show product Thinking.

Benefits fail not because they don't exist, but because they arrive too late.

- 1 Timing
- 2 Clarity
- 3 Loss Awareness
- 4 Loss of Confidence.

THE SOLUTION

A Decision Intelligence Agent for Visa Card Benefits

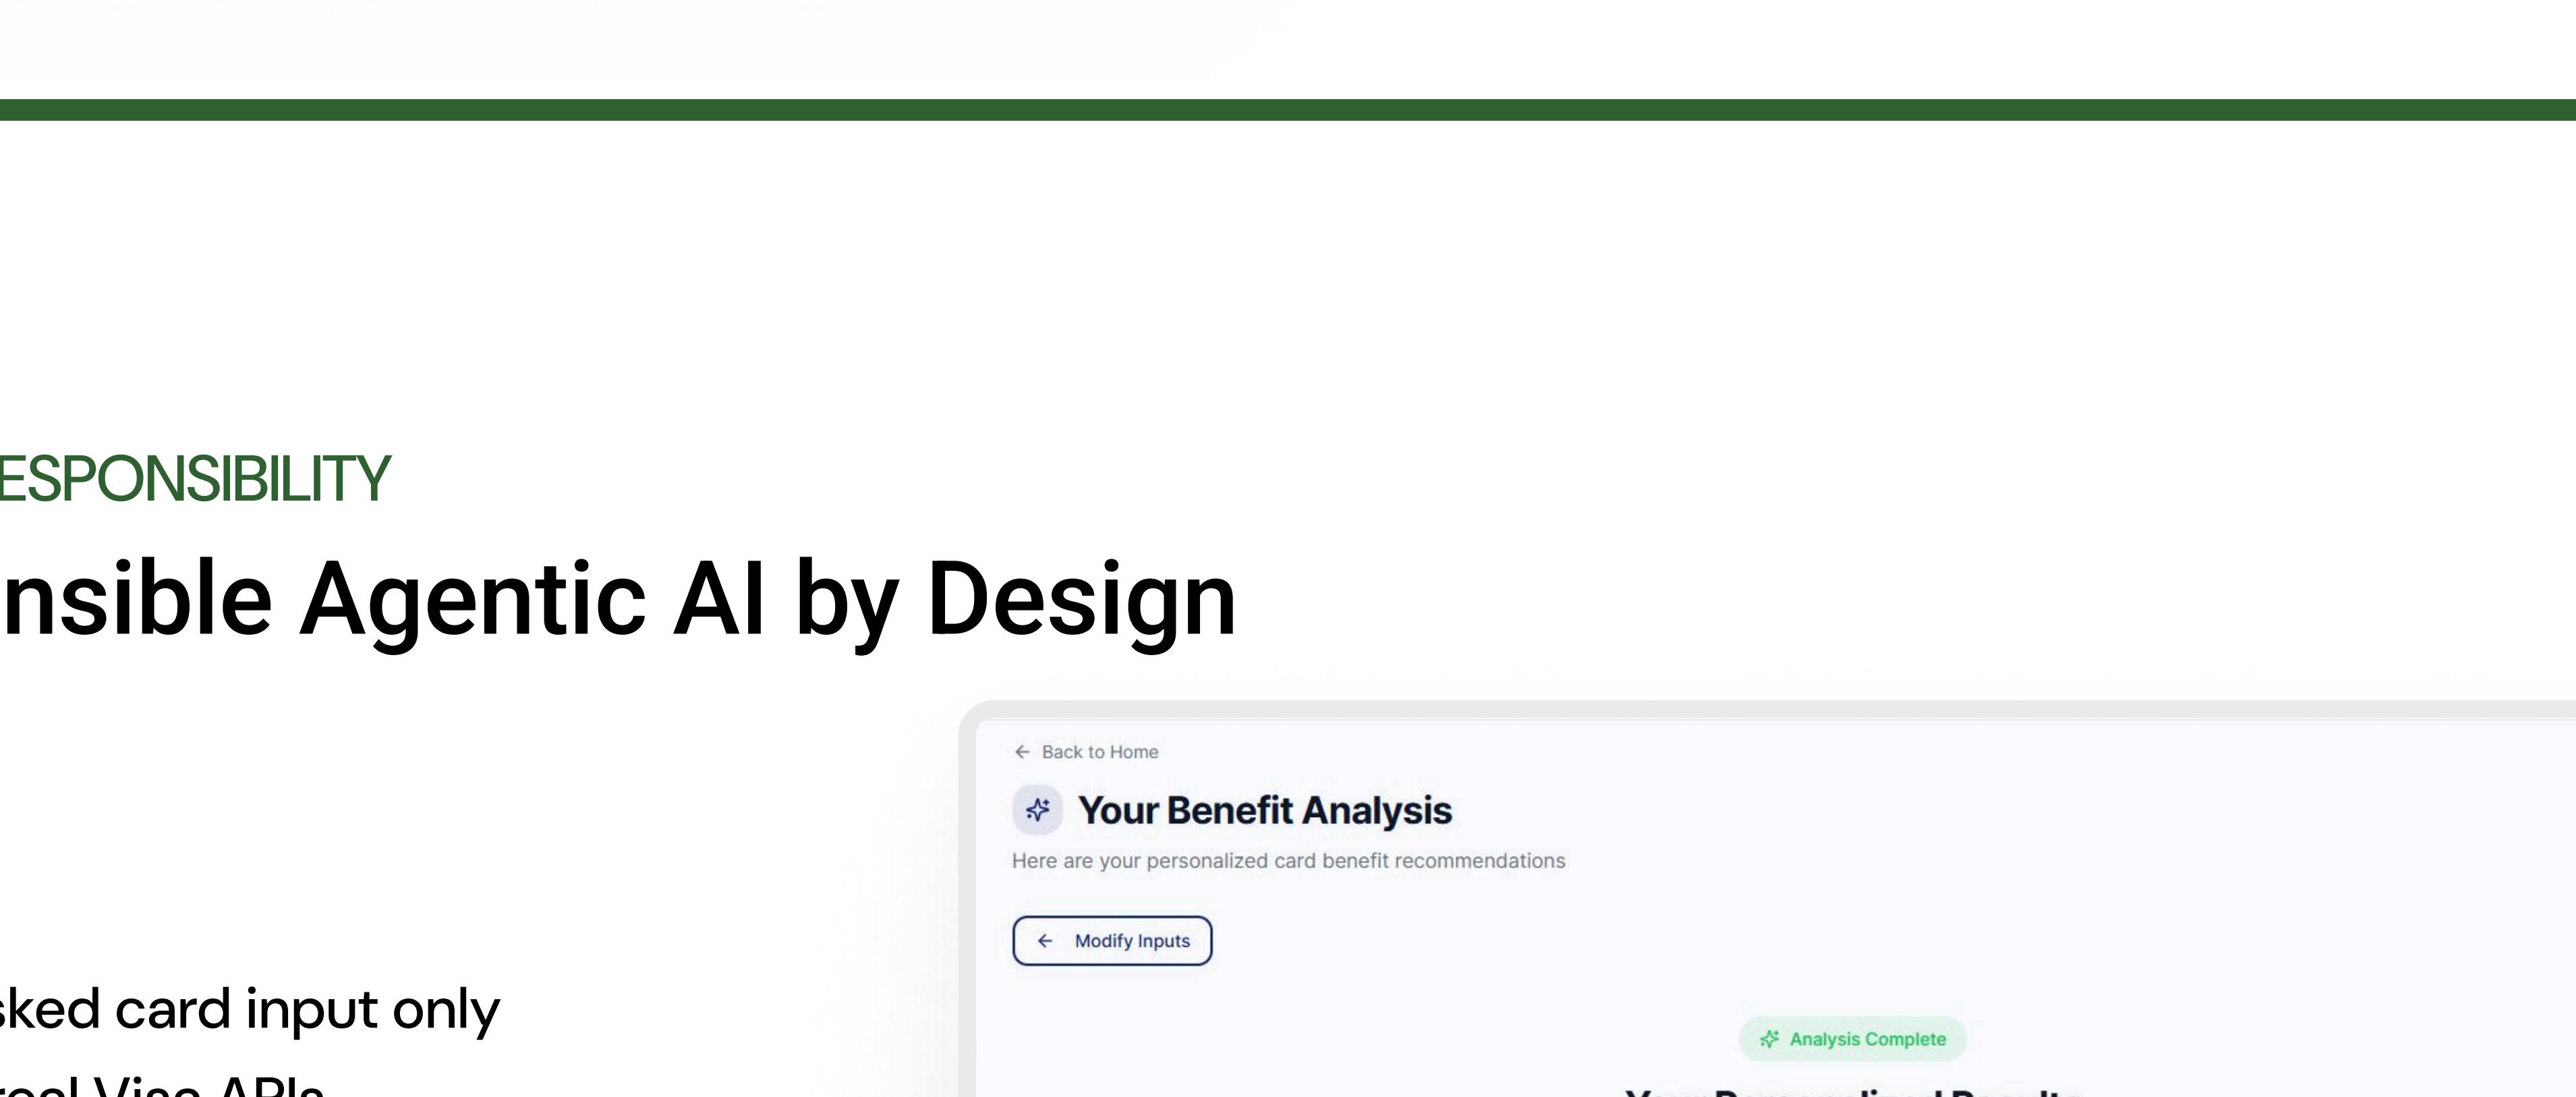

A privacy-first, agentic AI system that autonomously decides what benefit to use right now, where, and why, based on context, not history

What it's NOT

- Not a chatbot
- Not a benefits list
- Not a payments app

THE SOLUTION

HOW IT WORKS

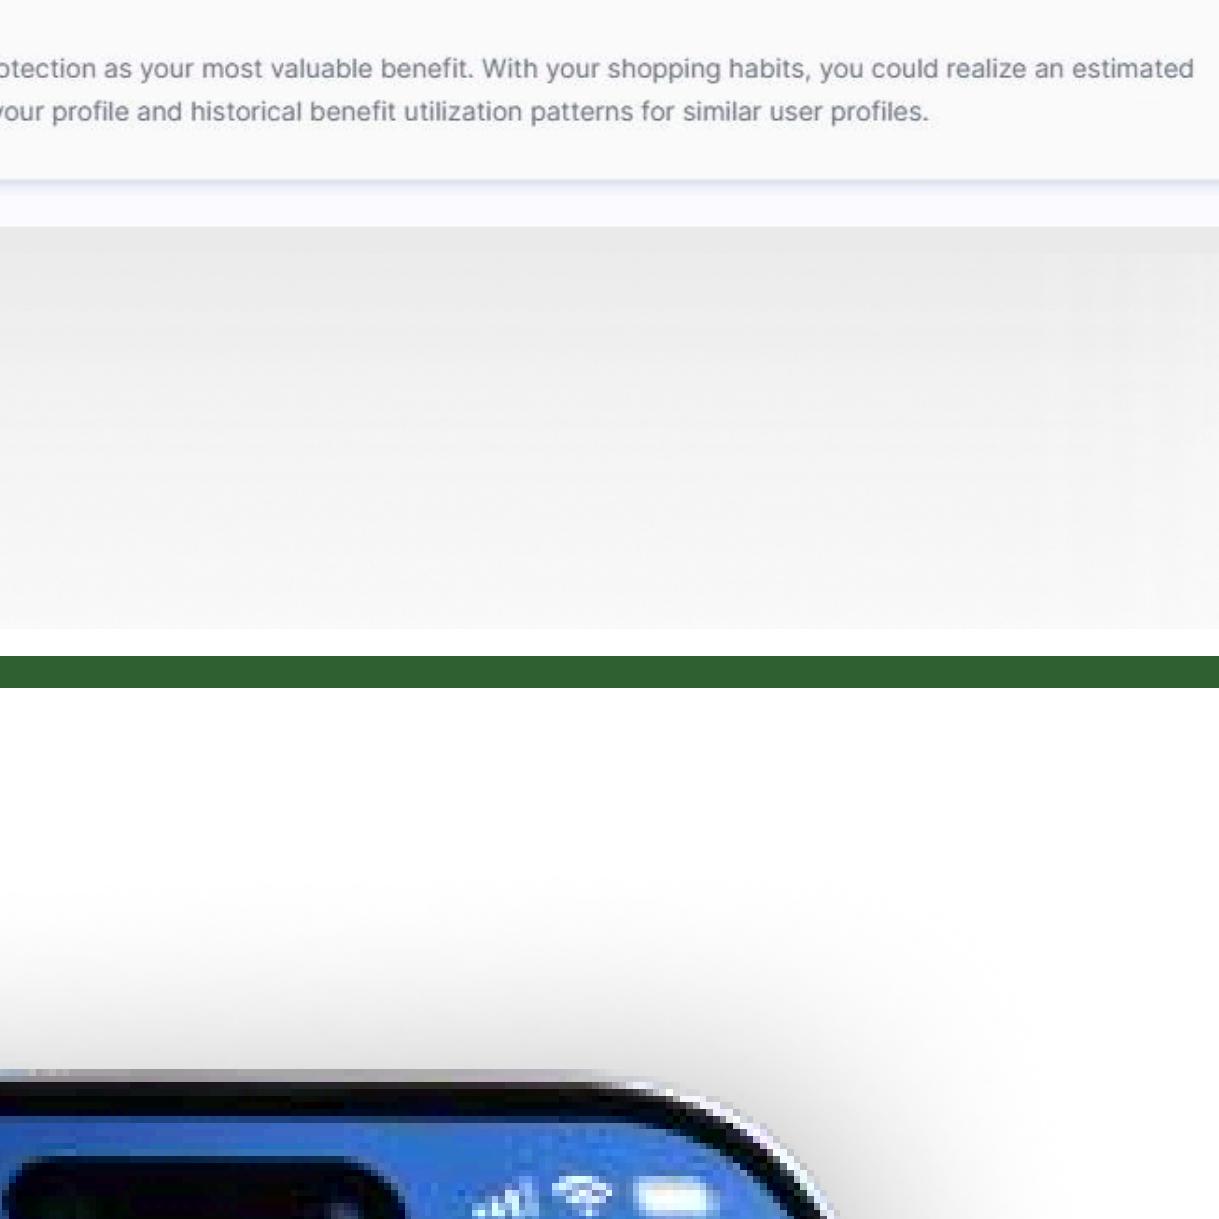

THE SOLUTION

Best Benefit for You – Right Now

Dining Cashback
AI-selected based on your current context
Most students here miss ₹900–₹1,200/month

Simulated No personal Data AI reasoning available

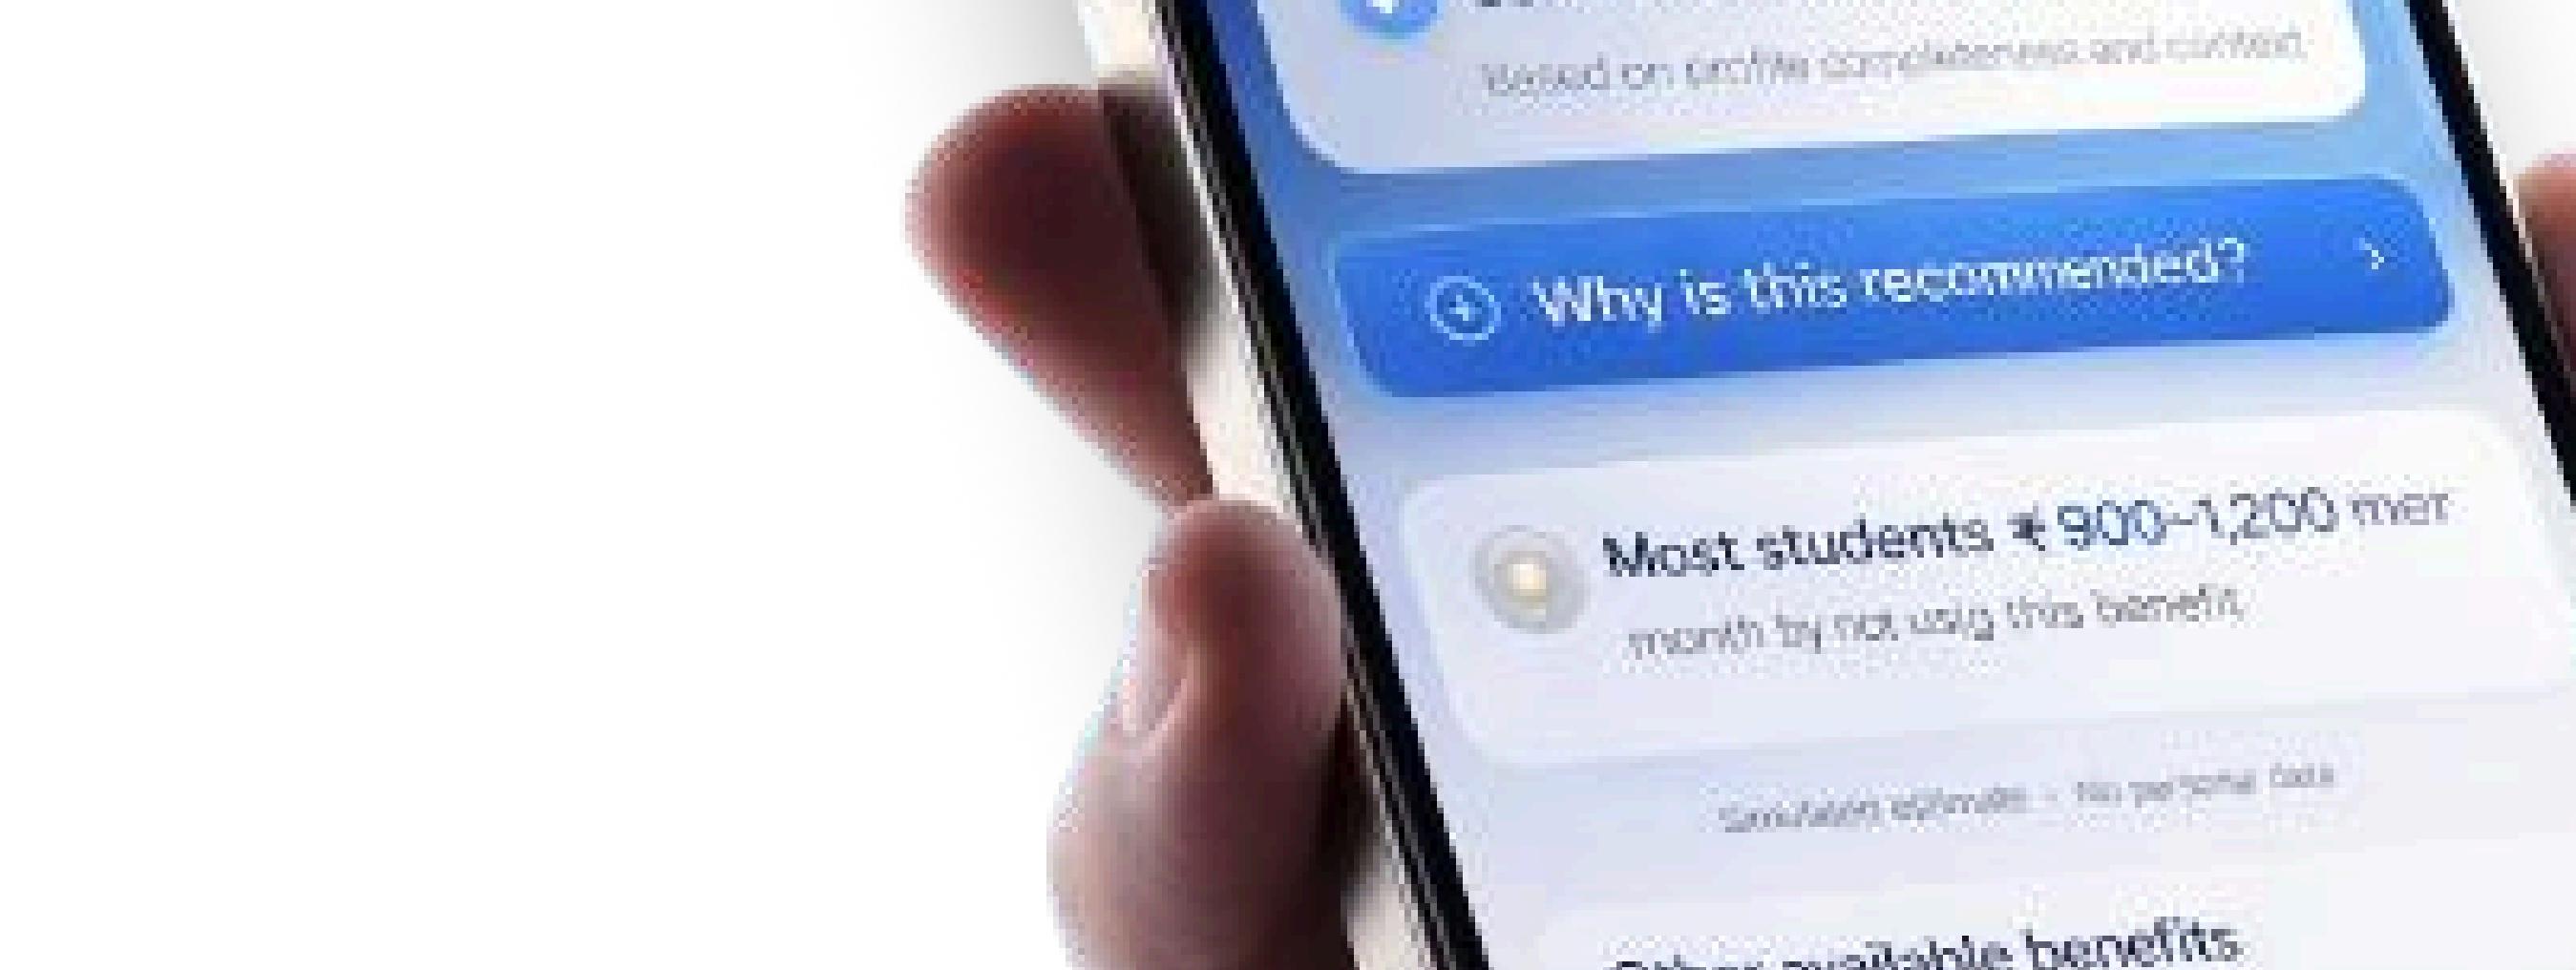

TRUST & RESPONSIBILITY

Responsible Agentic AI by Design

Checklist:

- Masked card input only
- No real Visa APIs
- No transaction data
- No storage or tracking
- Awareness-only decisions
- Human-readable explanations

Decision intelligence, not feature overload.

WHY THIS WINS

Why This Stands Out
